### **DETAILED ACTION**

Claims 1, 3-5, 10-15, 17-18, 23-28 and 45-58 are pending in the application and were examined on their merits.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a previous Office Action.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3-5, 10-15, 17-18, 23-28 and 45-58 are newly rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1, 3-5, 10-15, 17-18, 23-28 and 45-58 either recite, or depend upon a claim which recites "including diverse molecules with no predominant molecule'. The metes and bounds of this phrase cannot be clearly delineated. Thus, the ordinary artisan would have trouble ascertaining if they were in possession of the invention. For these reasons, the claims are deemed indefinite.

Although Applicant argues that 'such extracts have been well known for more than a thousand years', Applicant has not specifically defined such an extract or provided evidence which would indicate that such an extract is 'well known' as contended by Applicant.

Claims 1, 3-5, 10-15, 17-18, 23-28 and 45-58 remain rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The language which was added to the independent claims which recites 'including diverse molecules with no predominant molecule' does not overcome this rejection because the extract can still be directed toward every known extract, and extracts which have not been envisioned.

Applicant argues that 'such extracts have been well known for more than a thousand years', however, the Examiner does not understand what extract this phrase is referring to (please also see rejection under 35 USC 112 second paragraph rejection *supra*).

***Claim Rejections - 35 USC § 103***

Claims 1, 3-5, 10-15, 17-18 and 23-28 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Vedros (US 5,198,217) in view of Biegajski et al. (US 5,700,478).

Applicant argues that Biegajski does not teach that the oral patch could be used for treating canker sores and that Vedros does not disclose licorice into an oral patch. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Further, the rationale to modify or combine the prior art does not have to be expressly stated in the prior art; the rationale may be expressly or impliedly contained in the prior art or it may be reasoned from knowledge generally available to one of ordinary skill in the art, established scientific principles, or legal precedent established by prior case law. In *re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988); In *re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). See also In *re Kotzab*, 217 F.3d 1365, 1370, 55 USPQ2d 1313, 1317 (Fed. Cir. 2000) (setting forth test for implicit teachings); In *re Eli Lilly & Co.*, 902 F.2d 943, 14 USPQ2d 1741 (Fed. Cir. 1990) (discussion of reliance on legal precedent); In *re Nilssen*, 851 F.2d 1401, 1403, 7

USPQ2d 1500, 1502 (Fed. Cir. 1988) (references do not have to explicitly suggest combining teachings)(emphasis added); Ex parte Clapp, 227 USPQ 972 (Bd. Pat. App. & Inter. 1985) (examiner must present convincing line of reasoning supporting rejection); and Ex parte Levengood, 28 USPQ2d 1300 (Bd. Pat. App. & Inter. 1993) (reliance on logic and sound scientific reasoning).

Here, the motivation to perform the method of the claims flows naturally from the teachings of the prior art.

In response to applicant's argument based upon the age of the references, contentions that the reference patents are old are not impressive absent a showing that the art tried and failed to solve the same problem notwithstanding its presumed knowledge of the references. See *In re Wright*, 569 F.2d 1124, 193 USPQ 332 (CCPA 1977).

From the teachings of the references, it is apparent that one of ordinary skill in the art would have had a reasonable expectation of success in producing the claimed invention. Therefore, the invention as a whole was *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, as evidenced by the references, especially in the absence of evidence to the contrary.

No Claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
